# NICHE™

The rising popularity of disposal by cremation presents a unique challenge, and opportunity, for the death care industry.

The Trigard Niche Tower™ rises to the challenge, providing a memorialization solution that incorporates versatility, economy and beauty – meeting the needs of funeral directors, cemetery owners and their clients.

The Niche Tower is an easily shipped and assembled multistage system with an incredibly small footprint. Encompassing an area of less than nine square feet and measuring just under three feet across at the base, the Niche Tower transforms cemetery areas previously considered too small or otherwise undesirable into lovely and profitable spaces with minimal investment.

Strong, secure and finished beautifully in superior granite panels, the Niche Tower is a stately and reverent focal point for memorialization. Whether you require only one unit for a secluded tribute grotto or are designing an entire memorial garden, don't hesitate to put the versatility and beauty of the Trigard Niche Tower to work for you.

The Niche Tower is available in a variety of superior granite finishes and easily accepts Trigard Bronze niche plates, medallions and urns for the ultimate in personalization.
